

Harbor Ham Un-club
Minutes 03/15/23

The March evening meeting was held under a social agenda, however there were some announcements and agreements of note:

- Since March has an extra Wednesday, we will fill it with an evening class on using a vector network analyser (VNA) to tune antennae. We will try starting at 1700 local (5:00 pm) and see how that time works for us.
- Our April class will be building a 2 meter hand-held antenna for the fox hunt, we will be collecting \$20 at the April general meeting for a group buy of the materials.
- The fox hunt itself will culminate in a hosted barbeque at the lair of the fox (I refuse to look up the proper possessive form for a fox) and \$20 will get you a meal plus your choice of an iron-on or vinyl cutout logo.
- I know June is still a long ways away, even if my neighbors are mowing their lawn already, but we need to start getting our wish lists for bands and modes into our fearless Field Day Site Captain Ron. Please don't make him leave it all to the last minute like I would.
- Finally, it was pointed out that we might be falling behind on our plans to staff the Base Station with members. We will probably talk about this again soon.
